

RaileRobotics 935

As a representative team of the FIRST robotics program, our goal is to foster an experience to educate ourselves and others about the opportunities and skills in engineering for the benefit of the team, our school and our community.

Dear Supporters and Parents of RaileRobotics 935:

RaileRobotics has been providing a STEM experience for Newton High school students, as well as students in surrounding communities since 2001. During the 2021-22 school year we had 6 students grades 9-12 work together to problem solve through the robot design and build process. They went on to compete at two different competitions during the spring. Throughout the season students work within the real world constraints of budget and time limits as they build and code their robot.

Although we do have fundraisers throughout the year, the majority of funds raised by the team come through business sponsorships and other donations. Might you consider becoming one of our donors? We hope you will consider making a financial contribution to help support our dedicated, hardworking, talented students. However, if circumstances do not allow you to contribute, we have many other ways you may support the team through mentoring, Dillons community rewards points, other resource donations, publicity within the community, help with fundraising opportunities and words of encouragement. You may contact one of the coaches listed below for other opportunities to support the team.

Please include this contribution form with your donation and mail it to the address listed below.

Thank you so much for your continued support of RaileRobotics 935!
